

A scanning electron micrograph (SEM) showing a textured surface. The surface is composed of a fine, granular matrix with various dark, irregular features. A prominent, lighter-colored, angular feature is visible in the lower right quadrant. The image is labeled with 'C-S-H_i' in the upper left, 'HADLEY grain' in the center, and 'C-S-H_o' in the lower right. A scale bar in the bottom left corner indicates a length of 1 μm.
